

Teams frequently loop back & forth between stages as new insights emerge

→ Tonight look back phase 1 and do phase 2

My project / Topic 16

E-Commerce Platforms for Artisan Communities

⇒ 2 key words

In KIEN GIANG Province

↓ Phase 1 ← Result of Research information ↓

Design Thinking

① → Emphasize

(Understand customer)

↓ Observation

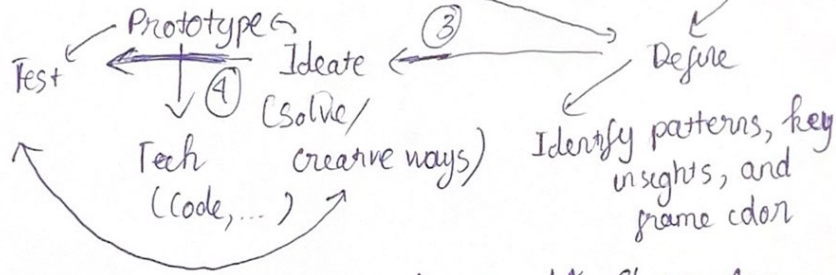

Interviews /

Immersing myself

⇒ Check assumptions & gain genuine insight

Gather information

②

Phase 2: → Design Platform

Administrator (My team)

① User/Buyer

② Artisan Communities

Database storage

Transfer Languages

⇒ Phone / Mobile App / Computer App

AI-Auto matching need & supply

Web Application Connect communities

what if user can updated item to sell

⇒ code for higher score / grade
